ARIENS CAPTURE BERLIN.

Our German Singers Create a Sensation in the Fatherland.

SPECIAL CABLE TO THE EVENING WORLD:
BERLIN, July 12.—The Singers of the Art Society, of New York, have created a sensation here, and they are being entertained by the musical people of the German capital in royal style.

The concert which they gave at Philharmonic Hall last evening was a splendid success. It was attended by the local musical celebrities, King of Saxony, Wilhelm Taepert, Otto Lehmann and Adolf von Hildebrand.

Hymnological Fests, of Berlin and hundreds of Americans, among them Minister William Weller, Walter Phelps, Consul-General Edwards and ex-Senator John J. Ingalls, were also present. Crowds had to be turned away, because the hall could not find even standing-room.

Miss Maude Powell, the violinist, and Franz Hummel, the pianist, received a tremendous ovation, and Conductor Frank Van der Stucken was presented with a laurel wreath.

The visitors will be entertained this evening at a great concert, and a popular concert will be given at the Tivoli, for which 5,000 tickets have already been sold.

10,000 WILL REMAIN LONGER.

These Christian Endeavorers Want to See More of New York.

It took two policemen to keep in line the crowd of delegates applying at the Christian Endeavor ticket office, 15 West Twenty-fourth street, this morning, for an extension of their stay.

The origin of the fire was unknown.

WIZARD EDISON WORSTED.

Swan Declared the Original Inventor of Electric Light Carbons.

The Commissioner of Patents at Washington has just rendered a decision declaring that Joseph W. Swan, and not Thomas A. Edison, is the original inventor of the electric light carbon.

Edison filed his application for the patent in question April 12, 1880, while Edison's application for the same invention is dated May 27, 1881. The Wizard claimed, however, that in his invention in October, 1879, and in the first year or two thereafter he had no knowledge of any prior work in the field.

The present decision is based upon an appeal taken by Mr. Swan from the Examiner. The Commissioner says that although Edison is the original inventor of the invention in 1879, as he claims, the probabilities are against him.

The time specified expires July 15, but by surrendering their tickets until the morning of departure the delegates may remain until Aug. 15.

TRUNK LINE PASSENGER COMMISSIONER I. P. SWAN, who came to New York Monday, said that about ten thousand delegates would remain in the city longer than July 15. The other 25,000 have either started or will start home before next Friday.

HELD UP IN SOUTH STREET.

Taylor Shattuck Was Robbed and Beaten for Resisting.

Samuel F. O'Connell, of 41 Rutgers street, was held this morning in Essex Market Court charged with highway robbery.

Michael Shattuck, a tailor, of 647 Water street, was walking along South street with his wife yesterday afternoon, when three men knocked him down and robbed him of his coat, besides giving him a beating for resisting.

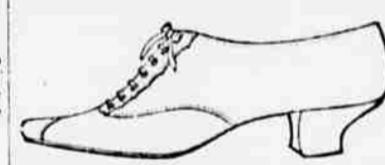

Policeman Mulcahy, of the Madison street station, caught O'Connell. The others escaped.

STABBED BY HIS WIFE.

The Had Her Husband Arrested and Then Made Her Escape.

STEVEN STEVENSON, a tinker, arrested in Hoboken last night charged with beating his wife, was this morning discovered to have a serious stab wound in the abdomen, which had been inflicted by his wife. When a policeman went to the Stevenson house in Hoboken he found her not there but it was said she had fled from the city.
